Introduction to programming

Lab 6

1. Do exercises on SPOJ at the following link:

https://www.spoj.com/EIUDISC2/problems/introf20_05/

2. Write a function to print all prime numbers less than an integer n (n > 0).

3. Write a function that accepts an integer n consisting of k digits (0 < k < 8) and an integer x (0 ≤ x ≤ 9), and find the first position where x occurs in n.

Example: n = 1526, x = 2 → return 2.

4. Do exercises on Code Learn: 76 – 83.
